Dr. M. Demerec
Carnegie Institution
Cold Spring Harbor
Long Island, New York

Dear Demerec:

I have a letter from Wilson Stone, the secretary of the Naturalists, informing me that he has been unable as yet to get any commitment from Rodenhiser concerning reprints of the Symposium on genetics of microorganisms given by your group at the Chicago meetings of the A.A.A.S. in 1948. As Stone no doubt wrote you the Naturalists send out copies of the Symposium to all members and it is very important for them to get a complete set for distribution. Since Rodenhiser will not communicate with Stone on this matter, I wonder whether you could cooperate to the extent of putting a little fire under him and getting some response. We hope you will not let us down on this.

With best wishes,

Cordially yours,

T. M. Sonneborn
